

Linear Fire Features

Remote Electronic Gas Fire Pit Inserts....Linear

How nice it is to have instant fire at your finger tips— just use the handheld remote or flip the wall switch. No more match lighting your gas fire pit or collecting wood / emptying ash for wood burning.

These electronic ignition fire features are state of the art using a revolutionary control module with thermal flame sensing— very robust, reliable, and built to last. Comes fully assembled with control box mounted under the pan.

The inserts are certified by CSA International for the United States and Canada— meets the U.S. ANSI Z21.97-2010 & Canadian ACR97-003 standards.

Linear Features...

- Remote start with handheld remote or wall switch.
- Automatic restart if blown out in high wind.
- Safely turns off gas if no flame presence.
- Trough pan, burner & control box made of rugged #304 stainless steel for durability.
- Very slim design— only 8" wide.
- Fuel efficient— since uses linear burner, delivers 10~12" flame height with low fuel usage.
- Built for Natural Gas or LP.
- 3 year warranty on hardware; 1 year warranty on electronic & gas controls.
- Optional power input— 120v or low voltage 24vac available.

What's under the flame makes the difference!
