morsø

— 160 YEARS —
of special moments

A close-up photograph of a black, textured surface, possibly a piece of furniture or a lamp. A small, rectangular metal pin is visible in the upper left corner. The word "morsø" is embossed in a stylized, lowercase font on the surface.

morsø

For more than 160 years, Morsø has spread warmth through our homes, creating special moments of pure happiness, closeness, peace of mind. And comfort.

A CHOICE FOR LIFE

When you eventually put this literature down, the likelihood is you'll be sold. You'll have fallen for Morsø's timeless look. You'll have fallen in love with cast iron's unique properties. And you'll be convinced of our stoves' obvious advantages for the environment.

But believe us – when you describe your relationship with your Morsø in the future, it won't be the design, the cast iron or the stove's green-friendly impact which will fuel your fondness. By then, your stove will have already become one of the most-loved items of furniture in your home. A trusty source of comfort, you will love it for its sound, look and warmth. And for the glow of happiness it has spread throughout the house year after year.

To choose a Morsø is, in other words, to make a choice for life.

5660-inserts

5660

with glass front - 5660

The Morsø 5660 is an advanced fireplace insert, which fully lives up to our craftsmanship traditions. The design is strict, modern and stylish, while the cast iron's raw and living structure gives the insert a rustic tone. Our innovative insert has an advanced combustion system supplied with tertiary air, enabling the stove to comply with the strictest, modern requirements for environmentally-conscious heating. The fireplace has an extra large combustion chamber which can accommodate logs of up to 20" – for those cold winter evenings. An optional outside air kit is available for this stove.

Heats up 50,000 BTU/hr

with blower 5660

The Morsø 5660 is an advanced fireplace insert, which fully lives up to our craftsmanship traditions. The design is strict, modern and stylish, while the cast iron's raw and living structure gives the insert a rustic tone. Our innovative insert has an advanced combustion system supplied with tertiary air, enabling the stove to comply with the strictest, modern requirements for environmentally-conscious heating. The fireplace has an extra large combustion chamber which can accommodate fuel sizes of up to 20" – for those cold winter evenings. For new home installations an optional Morsø 5660 Zero-Clearance Enclosure is available for each 5660 model (specific installation instructions apply). The recommended framing dimension for the Morsø 5660 Zero-Clearance Enclosure is: 67" H x 39¾" W x 25½" D. The fan is "high quality adjustable 110 CFM fan that is powerful and very quiet.

Heats up 50,000 BTU/hr

2110

Morso 2100 Nostalgic look, glowing with Danish charm. The 2110, which is very spacious and effective, and the creation of the English designers, Queensbury Hunt. Together with the designers, we have created a powerful radiant stove, which is a true representative of the proud Morso heritage. The Morso 2110 has an extra wide combustion chamber, allowing the use of large-sized fuel. At the same time, the width of the doors facilitate large glass windows, allowing you to gaze at the slow crackling fire.

3610

3610

The Morsø 3610 features a classic design with a modern 'edge' and is the largest wood stove in the Morsø product line. The high heat output and large firebox capacity makes this model particularly suitable for large traditional or modern living spaces. It features double door design with large 'air-washed' glass panels for a great view of the fire, two internal ash pans for convenient and clean ash removal, and a side loading door makes refueling a breeze. The Morsø 3610 comes factory fitted with rear and bottom heat shields as standard. Robust yet elegant the 3610 is a real workhorse controlled by a single-handed air control lever at the front.

Heats up to 60,000 BTU/hour

7110

7110

A Modern Interpretation of Classic American Design. The Morsø 7110, designed specifically to meet the needs of the North American markets offers classic design elements with a modern presentation. The single door approach incorporates a large 'air-washed' window for a fantastic, unobstructed view of the fire. Perfect for medium sized living spaces the Morsø 7110 features an external ash pan for clean and convenient ash removal, a reversible flue collar for flexible installation and rear and bottom heat shields come fitted as standard. The beautifully crafted side castings feature an ancient Viking Symbol, The St Johannes Shield.

2B Classic

2B Standard

Morsø 2B classic No past – no future. At the beginning of the 1930s, the sculptor, Constantin Sørensen, created this impressive radiant stove, featuring Morsø's well-known decoration of squirrel and oak leaves. Then, as today, the 2B Classic is in great demand, and with its almost stately appearance, the stove is perfect for patrician and farm style homes. The stove's special feature is its combustion chamber, which can accommodate extra long fuel measuring up to 18". We have completely updated the combustion technology in the Morsø 2B Classic, so that it now meets today's stringent environmental requirements. There's almost no better way to have a fire than with the Morsø 2B Classic.

2B Standard & 2B Classic heat up to 35,000 BTU/hr

1400-series

1410 - with rib squirrel

Morsø 1400-series A steady beating heart. The Morsø 1400 is the quintessence of a charming stove. It represents what was the heart of many a home, what we know and remember from our childhood. The combustion technology of these classic stoves have since then been further developed and improved so that harmful particles and surplus gasses are burnt off. That's why, today, the stoves fulfil the strictest environmental requirements and also bear the Nordic Swan Eco-label. Despite all improvements in technology there are some details which remind timeless and a sign of quality, so Morsø's characteristic squirrel can still be found on the sides. It also available with contemporary ribbed sides.

with ribbed sides 1440

with squirrel sides 1410

3142 - with plain sides

3112

with squirrel sides 3142

Morsø 3100-series Following a thorough, technical upgrade and a design lift, the stove stands out with a contemporary, elegant look and meets all the latest combustion principles. With the Morsø 3100 we are continuing all the best points from the classic Morsø stove. Thus, the stove has smooth sides on the convection model and a very fine ribbed pattern on the radiant.

Heats up to 30,000 BTU/hour

soap stone 3450

3440 - with plain sides

We designed **the Morsø 3440** stove together with the well-known, English design company, Queensbury Hunt Levien, retaining the classic Morsø lines and stylish look, while also integrating an advanced combustion system. The wide door with large stove glass provides a wonderful view of the flames, helping create both mood and heat in the home. The 3400-series comprises two stoves.

Heats up to 35,000 BTU/hour

6140

6143

6148

The Morso 6100-series fans the flames. The stove's unique combustion system helps ensure a higher temperature in the combustion chamber, which means it burns off the flue gases. This provides you with a cleaner and more environmentally-friendly combustion and a higher level of efficiency, guaranteeing you good fuel economy. Furthermore, the elegantly designed glass door and hidden mountings provide a good view of the fire and flames. The 6100-series are 80.1% net efficient with almost no smoke emissions. Optional outside air kits are available for both models.

Heats up to 30,000 BTU/hr

with drawer - 7642

7644

7648

wall model - 7670

Morsø 7600-series was designed by Monica Ritterband, currently one of Denmark's most sought-after designers. Monica Ritterband is known for her pioneering designs, which all take their starting point in her unique universes and totally special, organic language of form and lines. Thus, the Morsø 7600 was also created in this way – it is completely unique with its circular form, round feminine transitions and its huge glass window, the biggest in Morsø's history of stoves.

With the **7900 series**, Morsø has worked with the designer Monica Ritterband to develop and create a new series of cast iron wood-burners, whose functionality and design suit any home - and of course with quality as the key. The 7900 series is an innovative design based on a modular system, that makes it possible to customise each wood-burning stove to suit individual needs, both in terms of design and functionality.

8140

8142

8148

The **Morsø 8100-series** has a clean and simple design, where the combination of soft, rounded contours and simple details give the stove a light and timeless look. This guarantees you a classically beautiful stove that will last for decades, while the cast iron's raw and living structure will provide both a rustic and exclusive tone.

TECHNICAL DATA

CHOOSING THE RIGHT STOVE FOR YOU

The Morsø range is extensive and comprises of stoves to cover a whole variety of needs. So, despite the fact that the natural thing to do is let taste and appeal decide, start by looking at the various models' and designs. We recommend you consider a few points first.

Radiant or convection stove?

There are two different types of stove: radiant stoves and convection stoves. The radiant stove concentrates the heat around the stove itself, while the convection stove quickly distributes the heat out into the whole room. The type you choose will therefore greatly depend on what you want your stove to do. If you want cosiness and warmth close to the stove, the radiant stove is a good choice. If, on the other hand, the stove is also to play an effective role in heating your home as a primary heat source, you should choose a convection stove.

What size?

The size of your stove is decisive for getting full pleasure of your investment. In this respect, too large can cause problems just as too small can. A stove that's too small will not be able to heat the room adequately. However, if you buy a stove that's too big in relation to the room, you will be forever cutting the air supply to keep the room temperature down. As a result, combustion will be incomplete and soot will quickly build up on the window and in the chimney. Not only that, the quantity of soot particles you emit into the environment will be disproportionately high.

We're hot for fire. One of our most important areas of expertise is the production of environmentally-aware stoves, and we happily describe ourselves as experts in combustion technology. The cross-section of the stove shown above outlines the stove's combustion and convection airflow system. Cold air is drawn into the stove and heated as it passes through the cast iron channels (the heated air washes the glass keeping it clean, clear and free from soot). The hot air also provides perfectly heated combustion air (in addition the heated tertiary air aids secondary combustion of any smoke and gasses, increasing efficiency and reducing the environmental impact).

Original accessories

MORSØ LEATHER GLOVE

This protective glove is made of thick leather. The gloves are available for both left and right hand.

MORSØ MINI STOVE

The Morsø Mini Stove 2B Classic is made from the same high-quality cast iron and with the same impeccable craftsmanship as a regular Morsø stove.
2BUO: 10 1/2" (h) x 3" (w) x 7" (d)

MORSØ CAST IRON TRIVET

Two Morsø trivets are available: the Classic Morsø Trivet with the original Morsø trademark from the 18th century monogrammed in the center; and the new Morsø Trivet that features the ever-popular Morsø squirrel.

LOOP LOG RING
& FIREPLACE TOOL SET

The Morsø loop Log Ring incorporates a soft rubber handle for carrying comfort and a soft rubber mat/tray. Dimensions: Mat: 24" x 14 1/2". Loop: ø 19"

ASSEMBLY AND MAINTENANCE

Owning a stove is a commitment and you must take care of your Morsø stove if you want it to last a long time. In this regard we advice you to use only genuine Morsø materials for installation and regular maintenance.

MORSØ DUSTPAN & BROOM

The dustpan is 7 3/4" wide and functionally executed with ergonomic rubber handles.

MORSØ CHILDGUARD

Efficient and elegant, this superbly constructed Morsø accessory is equipped with two side panels and wall fittings.
Height x Width x Length:
27 1/2" x 39" x 37".

MORSØ HEARTH PLATES

The Morsø black and steel hearth plates are made from 2 mm high-quality steel with a non-gloss finish that matches Morsø stoves. The Morsø glass hearth plate is made with 8 mm clear glass that has a specially beveled edge to give the hearth plate an elegant and exclusive look. The steel square and rectangle plates have slightly rounded edges.

MORSØ SINUS MULTIBAKET

Sinus is novel design when it comes to firewood baskets. The innovative choice of material gives it a warm and fascinating expression. Available in two sizes and 1 colour: mocca brown. These baskets are ideal for firewood as well as for newspapers or the children's toys.

Original accessories

It's not just the wood-burning stove itself that emits the special atmosphere of warmth and comfort in your home.

CURVA FELT BASKET

CURVA

With "CURVA", Morsø has created a functional and aesthetically beautiful piece that encompasses all the fire tools in such a way that each product in the series has its own function, and nothing is superfluous.

CURVA FIRE TOOLS

CURVA POKER

MORSØ FIREWOOD BUCKET
LARGE & SMALL

The Morsø Firewood Bucket is painted in a non-gloss powder coating that gives the bucket the same surface finish as a Morsø stove.
Height x Diameter: 13½" X 17½".

SIMPLICA HUMIDIFIER

The glossy stainless steel handle contrasts to the black enameled cast iron and the grip made of solid rubber makes it safe and comfortable when moving the humidifier under all conditions. Content 1,5 l.

FIREPLACE TOOL SET COMPLETE

Complete Fireplace Tool Set is very well thought out and has clean lines, making it a perfect companion to Morsø's minimalist stoves. The tools are made of quality materials with comfortable rubber grips.
H: 16" x W: 8" x D: 4½".

MORSØ FLUE GAS THERMOMETER

The Morsø flue gas thermometer is attached to the flue pipe with a magnet and is used to measure the temperature of the smoke in the flue pipe right above the stove.

MORSØ CAST IRON HUMIDIFIER

Morsø cast iron kettles are available in two sizes, 2.0 liter or 4.5 liter. Made of enameled cast iron.

MORSØ MOISTURE METER

Ensures that wood fuel has the correct moisture content thus maximizing fuel combustion and fuel efficiency.

MORSØ CANVAS WOOD CARRIER

Made of black canvas and has sturdy wooden handles.

MORSØ FIRE TOOLS CLASSIC

The classic Morsø, with the Morsø squirrel. Height: 27"

MORSØ ASH AND STORAGE BUCKET

This four gallon bucket comes with a tight fitting lid to ensure containment of ashes until all embers are put out.
Height x Diameter 14½" x 12".

• MORSØ FORNO

Winner

MORSØ FORNO is the outdoor oven that creates a cozy atmosphere on your terrace and it lets you create crisp pizzas and perfect bread in just a few minutes.

Using the Morsø Tuscan Grill as a coal insert, delicious steaks and vegetables can be prepared with well-defined Grill marks.

And the latest addition for the Forno, a separate stainless steel door is now available, that, when fitted on the Morsø Forno, makes both slow cooking, baking, and smoking possible.

The Morsø Grill Forno is made from a solid enameled cast iron that gives unsurpassed advantages in connection with grilling.

A charcoal insert and a grill grate both made from cast iron come with the Grill Forno. The special surface of the grill grate has innumerable small pores that absorb the fat and flavourings from the meat. A unique feature which ensures that the meat is grilled in its own juices.

The outdoor fireplace **Morsø Kamino** is shaped from cast iron and can – besides decorating and heating all outdoor surroundings – also prolong the outdoor experience – from early spring months, through the chilly summer nights until the beginning of autumn.

Morsø GrillCocotte

The designer Klaus Rath had created an innovative composition of a grill pan, pot, and roaster for Morsø. The set consists of a pot and a grill pan that can be used individually, or the two elements used in different configuration giving no less than four functions.

Turn over the Grill pan and use it as a lid for the pot, producing an elegant roaster. Alternatively flip over the pot and it becomes a lid for the grill pan, making a perfect resting pan for steak or roast.
