

RAIS Gabo

RAIS[®]
ART  OF FIRE

The clean and modern design of the RAIS Gabo characterizes RAIS. Combining aesthetics and functionality, the RAIS Gabo looks like an artistic creation. Equipped with a turntable (optional) that offers a view of the fire regardless of where you are in the room, the RAIS Gabo does not have a shaker grate or ash pan but comes with a tight door and provides optimal combustion.

We understand that tastes differ and that is why you can choose a RAIS Gabo with a convection grate in the same color as the stove or one with stainless steel.

The air supply is operated with a simple and functional handle.
