

RAIS Rondo

Filled with warm memories, the RAIS Rondo was designed by using the concept of The Original, a tripartite stove with firewood storage, a firebox and a baking compartment. With an updated contemporary combustion technique and high-quality materials, the RAIS Rondo is a design marvel, a modern classic. Besides the RAIS air-cooled hollow handle, which comes standard on all RAIS stoves, soap stone in the baking compartment is included. This product offers an extraordinary visual experience to go along with the generation of cozy warmth. The RAIS Rondo has an extra-large glass pane door that invites you to lose yourself in the glow of the fire. You may decide to enhance the visual experience by adding the optional turntable or soapstone top as a unique finish.
