Case Study Photo Tips

Best photos from a 3.2 megapixel or better camera

- BUT if the only available camera is of a lower resolution, don't hesitate to use it!

Do not submit high resolution photos for each and every job

- please file photos in case a magazine or other publication should require them in future
- if possible submit a PDF collage of photos

Photo Content

- Take a shot of the OUTSIDE of the building showing the company's sign/logo/identity
- Close-ups of the heater with a factory floor in the background (requires a high angle - if available)
- Take patio shots during busy hours when patrons are on the patio
- Likewise, include any typical activity/condition of the business in the shot if possible:
 - ie: Aircraft hangar with airplanes in it
- And always, always remember not to close both eyes when shooting!

Our sincere Thank You! for this Case Study information
