Minimum Invoice: A minimum order of \$50.00 is required for invoicing

patioSchwank Returns Policy

The complete 'Returns Policy' is available from Customer Service, or at www.patioSchwank.com in the "Published Info" area.

Approval must be issued in advance by Schwank before any returns will be accepted.

All goods being returned must be accompanied by a completed Return Authorization form.

Schwank reserves the right to disallow the return of sold goods.

Warranty Returns

SCHWANK is proud of the quality of the products we distribute through your Organization; Some product components do fail occasionally. If this occurs, the following procedure must be followed:

- 1** Heater MODEL # & SERIAL # are required for any technical services contact
- 2** Contact SCHWANK to be issued a Return Authorization form
- 3** If you wish to return a product for "advance warranty replacement", SCHWANK will send the Return Authorization Form to you along with the advance replacement product(s). This form must be completed and returned to SCHWANK along with the product(s), shipping "Prepaid" - Schwank will refuse "Collect" shipments. At SCHWANK's discretion, SCHWANK may instruct you to field scrap the failed part. In such case, the Return Authorization Form must still be completed and returned to SCHWANK by fax or mail
- 4** Upon receipt of the product and/or the Return Authorization Form, SCHWANK will determine if credit is warranted
 - ✓ if credit is warranted, a credit notice will be issued
 - ✓ if credit is not warranted, an explanation of credit rejection will be sent to you. Unless advised otherwise, the product will be held for 30 days and then scrapped

Restocking Returns

If an item is to be returned to Schwank stock for credit against an invoice, please follow this procedure:

- 1** Contact SCHWANK customer service to be issued a Return Authorization Form
- 2** SCHWANK will forward a Return Authorization Form to you. This form must be completed and returned to SCHWANK along with the product(s), shipping "Prepaid" - "Collect" shipments will be refused. The original invoice number must be indicated on the Return Authorization Form
- 3** Returned items must be in "new condition" and in original packaging / carton
- 4** Upon receipt of the product and the Return Authorization Form, SCHWANK will determine credit amount based upon:
 - a. items returned to Schwank stock are subject to a 25% restocking charge
 - b. damaged items will result in a credit deduction for any repair costs, or no credit value

Charge Backs

Heater must be properly commissioned and the Commissioning Form accurately completed and returned to Schwank. A Commissioning Form is located near the back of the I&O Manual supplied with each heater.

All charge back claims must be approved in writing by Schwank Technical Services prior to commencement of work.

PATIO HEATER SELECTION GUIDELINES

Patio layouts and conditions differ widely and usually require a unique heating solution for each patio.

Below are some guidelines to assist in the selection of heaters for your patio project.

Schwank offers design services for patio projects. Copy, complete and submit the form at the back of this price list.

General

- ☼ Gas fired infrared radiant heat is ideal for "spot comfort" applications like patios, waiting lines, and smoking areas.
- ☼ Besides temperature, wind-chill is the greatest opponent to comfort - any wind break will improve outdoor comfort.
- ☼ Heating customers from at least two sides is much more effective than heating from only one side.
- ☼ If a project faces budget constraints, it is most effective to heat only a portion of a patio. Spreading too few heaters over a larger area will not satisfy customers nor the owner.
- ☼ An investment in patio heating results in additional comfortable seating more cost-effectively than any other renovation.
- ☼ 24 volt control patio heater models can be centrally operated from a patio panel, or by remote control.

2300 Series Luminous Heaters

- 25,000, 35,000, and 50,000 Btuh Natural Gas or Propane Gas
- 24V electrical supply & ignition - central or remote control
- Best suited to 'open' patios
- All models have a black emissive coated stainless steel lens - improves performance and helps heater "disappear"
- For use in salt-air coastal regions an all-stainless-steel-construction model is available

3000 Series Tube Heaters - SPW-JZ & STW-JZ

- 45,000 to 155,000 Btuh, 10 ft to 40 ft tube length
- 120V required for burner, but has 24V ignition for central or remote control
- Best suited for covered or enclosed areas - Tube can be direct vented to beyond the area being heated

SPW-JZ - Powder coated burner cabinet for standard covered or enclosed patio application

STW-JZ - Stainless steel burner cabinet for harsh or salt-air environments

4000 Series Parasol Heaters

- Traditional 'Parasol' (or 'Mushroom') appearance - aesthetic appeal
- Portable & fixed mount (post) styles available in propane or natural gas (except 4003)
- 45,000 Btuh natural gas or 46,000 Btuh propane gas (20 or 30 lb cylinder - 4003: 20 lb only)
- Finishes: Stainless steel, black or bronze 'hammered' texture powder coat
- Best for areas where temporary installation / portability is a must

Remote Control of patioSchwank Systems

Remote Control Options - Hand Set & Receiver:

- Four "ON/OFF" programmable buttons -> control any number of individual heaters or selected zones independently

OPTIONS: **ORDER ITEMS SEPARATELY**

- | | | |
|---|-----------------|----------|
| 1) Remote Control Receiver Kit field installed in burner: One per heater | JP-1234-RK | \$ 72.00 |
| - Includes receiver, wires, instructions | | |
| 2) Hand Set Control (four On/Off buttons) | each JP-1234-HS | 40.40 |
| - Regardless of the number of heaters, Schwank strongly recommends ordering two hand-sets per patio site so that one back-up hand-set is always available | | |
| - Each of four pair of On/Off buttons on the hand set can be programmed to control from one heater to any number of heaters in a zone | | |

patioPANEL ~ Central Control of patioSchwank Systems

Single heater per each patioPanel switch is recommended for best comfort control; at most two 2300 heaters per switch, only one tube heater per switch

- Panel switches have 24 volt capacity

24 Volt TRANSFORMER NOT INCLUDED - SEE NEXT PAGE for SIZES & PRICING.

<u>MODEL</u>	<u>HEATERS</u>	<u>PART #</u>		<u>LIST PRICE</u>
PCP-4	Up To 4	JM-0204-NT	\$	255.00
PCP-8	Up To 8	JM-0208-NT		320.00

24 VOLT CONTROL GUIDELINES

patio Schwank 2300 ~ Luminous Heaters

- Size 24V transformer 40VA for 1st heater + 30 VA for each additional heater
- patioPanel switches are 24 Volt capacity
- patioPanel: Size transformer for ALL heaters controlled by each individual panel
- for best comfort control, assign one heater to each patioPanel switch
- At most two 2300 heaters can be assigned to each patioPanel switch
- Remote Control: Size transformer(s) for ALL heaters installed on the patio

patio Schwank 3000 ~ Tube Heaters

- 120 V supply is ALWAYS required to the burner to power the blower and the individual transformer in each burner assembly
- patioPanel: 24V power to the panel switch is supplied from the transformer within the burner
ONLY ONE tube heater can be controlled by each patioPanel switch
- Remote Control: Burner is ready for installation of Remote Control Receiver Kit: JP-1234-RK
- Existing tube heaters in the field may still require the installation of optional JS-0568-KT 24V Relay Kit to allow 24 volt control (patioPanel, Remote Control, 24V Thermostat)

24V TRANSFORMERS for 2300 Series luminous heaters:

A patioPanel requires a 24 volt transformer to power the panel switches, and in turn power the heater(s). The transformer is sized to suit the total number of heaters being controlled by the panel - see below for sizing guide.

Remote control of 2300 Series heaters requires a 24 volt transformer(s) sized to suit the total number of heaters installed - see below for sizing guide.

Refer to previous page for guidelines on 24 Volt control of patioSchwank heating systems

24V TRANSFORMER SIZING GUIDE: patioSchwank 2300 Series heaters

- On a single heater use one 40 VA transformer.
- On a zone with multiple heaters, use transformer sized at 40 VA per first heater and 30 VA per each additional heater.

24V TRANSFORMERS

<u>SIZE</u>		<u>PART #</u>	<u>LIST PRICE</u>
40 VA Transformer	4"x 4" Electrical Box Mount	JL-0776-XX	\$ 67.00
100 VA Transformer	Closed Type	JL-0778-XX	127.00
150 VA Transformer	Closed Type	JL-0779-XX	152.00
200 VA Transformer	Closed Type	JL-0780-XX	174.00
250 VA Transformer	Closed Type	JL-0781-XX	191.00
350 VA Transformer	Closed Type	JL-0781-AA	223.00

See INSTALLATION MANUAL to determine gauge of distribution wire. (minimum 16 gauge).

Overhead Perimeter Mount System

Emissive Coated Stainless Steel Lens

- Maintains appearance
- Increases IR output

Remote & patioPanel Controls are listed on page P-17

24V TRANSFORMER NOT INCLUDED
- SEE PAGE P-19 for SIZES & PRICING.

			40'		2,131.00
SPW-JZ 130	NG	130,000 Btuh	30'		1,914.00
			40'		2,131.00
SPW-JZ 155**	NG	155,000 Btuh	40'		2,131.00

NOTES: Standard burners are stocked for natural gas only. Field conversion kits are required for conversion to LP Gas - refer to 'Burner Kits' page.

This burner draws combustion air through vents on the bottom surface of the cabinet. The SPW-JZ burner cannot accommodate a fresh air duct. Use STW-JZ if outside combustion air is required.

For outdoor applications, Schwank does not recommend tube length/firing rate combinations other than indicated above - for extraordinary projects, contact Schwank

** With a relatively high firing rate, the SPW-JZ 155 can be used for outdoor applications with mounting heights of 14 to 18 ft

Remote & patioPanel Control of patioSchwank 3000 SPW-JZ

PRODUCT WARRANTY PERIODS

The following warranty periods are effective on all shipments on or after July 15, 2004.

Since 1951 **Schwank** has maintained a reputation of building quality industrial heaters. For this reason, and for our customer's protection, **Schwank** is prepared to support its heating equipment with very comprehensive warranties.

Schwank warrants to the Purchaser that **Schwank** gas fired infra-red radiant space heaters and all parts, are free from defects in material or workmanship under normal use and service for the following periods of time.

	WARRANTY TERM (YEARS)					
	All Heaters	Luminous	Tube Heaters		Parasol	
Schwank Product	Components	Ceramic Tile	Burner Cup	Radiating Tubes	Burner	Mantle
PATIOSCHWANK HEATERS:						
- 1100	2	5				
- 2300	1	3				
- 3000: SPW-JZ & STW-JZ	3		10	10		
- 4000 (<i>All Models Except 4003</i>)	1				3	3
- 4003 (<i>Only</i>)	1				2	2

OPTIONAL ACCESSORIES AND REPLACEMENT PARTS ARE COVERED UNDER THE WARRANTY OF THE ITEM MANUFACTURER: TYPICALLY 1 YEAR

Product warranties consist only of providing a like replacement part for any defective part during the term of the warranty, F.O.B. Schwank.

Please note, that the above does not constitute a description of product warranty. It is intended only for general warranty term information and is subject to change without notice. A product warranty statement is supplied within each product manual.
